

Xerox Office Multifunctions

Print Costs

U.S. Cost Per Page

The tables below list the cost per page (CPP) for Xerox office multifunction devices using the industry standard measurements of 5% black coverage (a normal black-and-white text page) and 20% cyan-magenta-yellow-black coverage (a normal color page).

Many competitors publish cost-per-page values based ONLY on print cartridge or ink use rather than on all consumables. Xerox lists both sets of costs so that you can accurately compare products.

Definition: A print cartridge is a supply item that contains both toner and an imaging unit.

	Print Cartridge or Ink Only ¹ Low print volumes		All Consumables ² High print volumes

1. Cost per page based only on print cartridges or print cartridge equivalents. These values are more accurate for low-volume users who may never need to replace any long-life consumables, such as fusers, transfer belts or maintenance kits.

2. Cost per page based on all consumables, which may include fusers, transfer belts or maintenance kits. These values are more accurate for high-volume users who may need to replace long-life consumables.
